Jeff Bennett has been doing rivers in North and Central America as a guide, whitewater instructor, international racer and professional photographer since the early 1970’s. He has co-authored several other books, including Class Five Chronicles. The Complete Whitewater Rafter is the culmination of his river experiences and the progeny of his previous book Rafting!. Although sole author, he envisions The Complete Whitewater Rafter as the culmination of a river-running evolution that has been ongoing for the last half century. He has borrowed tips and techniques from contemporary instructors and classic technique textbooks. Bennett characterizes this book as a complete course in river running. For those who raft, the book has it all, beginning with a chapter on the Evolution of Rafting: From Powell to Paddle Cats and ending with a chapter that covers becoming a professional guide, whitewater photography, rafting for the physically challenged and rafting with children. I primarily bought the book to get tips on oar rigging and everything was there, including all existing boat, frame, and oar designs. The chapter on gear maintenance and repairs
was first rate and complete (it even included material on maintaining wetsuits, drysuits, lifejackets, and pumps). For those with interests in paddle rafts the cook covers all the strokes and more importantly has an entire chapter on Paddle Captaining: The Art of Whitewater Choreography. Several major rafting companies include this as mandatory reading for guide certification. Finally, the book has several chapters on multiday trips, which review packing and carrying gear, river camping and cooking, and river exploration.
