Ancient Aliens On Mars II

Synopsis

In *Ancient Aliens on Mars II*, New York Times bestselling author Mike Bara returns the reader to Mars to examine the enduring mysteries of the Red Planet. Building on the case made in *Ancient Aliens on Mars* and using data acquired from sophisticated new scientific instruments like the Mars Odyssey THEMIS infrared imager, Bara shows that the region of Cydonia overlays a vast underground city full of enormous structures and devices that may still be operating. He peels back the layers of mystery to show images of tunnel systems, temples and ruins, and exposes the sophisticated NASA conspiracy designed to hide them and discredit the researchers that discovered these exotic ruins. Bara also tackles the enigma of Mars's hollowed out moon Phobos, and exposes evidence from over 30 years of observations that it is artificial. Long-held myths about Mars, including claims that it is protected by a sophisticated UFO defense system, are examined and illuminated. Data from the Mars rovers Spirit, Opportunity and Curiosity is examined; everything from fossilized plants to mechanical debris is exposed in images taken directly from NASA's own archives. Finally, the author offers his take on the secret history of the Red Planet and what happened to the highly advanced civilization that once flourished there.

Book Information

Paperback: 294 pages

Publisher: Adventures Unlimited Press (September 12, 2014)

Language: English

ISBN-10: 1939149312

ISBN-13: 978-1939149312

Customer Reviews

Great Book! In this follow-up book, Mike Bara presents us with a truly fascinating series of actual photos of the Martian surface, as well as honestly speculative and intriguing interpretations of those photos, notwithstanding the unfairly negative critique from the Trolls (detractors) -- and very droll Trolls at that -- in the very first review posted on this website. The story Bara relates is exciting and

quite well-written, and I think Bara is justifiably indignant at NASA's unwillingness to acknowledge the very real and significant possibility that the photos of the Martian surface clearly, reasonably suggest that there exist numerous artificial structures there, otherwise indicative of an ancient Martian civilization. Bara discusses in detail, for instance, the photos of the Cydonia complex with its archetypal Face monument -- complete with pupils in eyes and nostrils inhering in the nose -- that is resting on a demonstrably bilaterally symmetrical platform, and the other surrounding unmistakably pyramidal structures, some exhibiting clearly extraordinary equilateral bases. He offers original photos and discussions of the block-patterned cityscape revealed beneath the plains of Cydonia, especially seen in parallel with the cityscapes and farmland regions on Earth. There are photos of this Martian cityscape showing also embedded tube-structures, apparently continuously supported with a rib cross-structure, extending for long distances, that appear to be some kind of subsurface transportation system.
