John Farnum, Vietnam combat vet, retired Major in the Reserve, police officer, author, lecturer, instructor, consultant and expert witness has instructed thousands in the art and craft of defensive firearms. This is his fifth book and the second edition of his rifle and shotgun book. In 231 pages he covers tactics, handling, shooting, maintenance, in the use of tactical shotguns and rifles. In addition he devotes significant space to the mind set and principles to help readers prevail in dangerous encounters. The book begins with a scenario - "You are facing four heavily-tattooed gang-members across the street. They are armed with knives and pistols that they are brandishing in a reckless and

threatening manner. In fact, they are shouting threats as they point their weapons at you... the range is 40 meters. They know, as do you, the police aren't coming and that no one is going to help you..." From here, Farnum begins a conversation with you that reads like he lectures - dynamic and fast moving. Half of the book is devoted to the shotgun, the other to rifles - not just any rifle or shotgun, but tactical, military type firearms. The reason is simple - military firearms are built to stand up to the abuse and heavy demands of combat and Farnum believes we should entrust our lives to nothing less. The book covers how to carry, deploy, use and maintain these weapons. One of the most useful features of the book is the detailed photographs that show how to maintain, carry, shoot, load, and clear stoppages. One of my favorite parts of the book is his recommended brands of rifles, shotguns, ammunition and accessories - as well as those that are definitely not recommended. All are accompanied by his reasons - for or against each item. Very helpful.
