Skateboarding: Ramp Tricks

Synopsis

Ramp tricks—skate moves made on, over, or around wood ramps, cement bowls, and half-pipes—are a key, albeit challenging, component of skateboarding. Hundreds of captioned, sequential photographs demonstrate precisely how these exacting moves are safely made in this indispensable guide to 40 ramp tricks. Beginning with basic moves, including stalls, grinds, and slides, skaters gradually learn the particular positioning and balance needed to perform more advanced tricks such as flips and airs. A brief history of ramp skateboarding examines the birth of the genre as well as champions of the sport, including the pioneering Dogtown Crew and current stars Bob Burnquist and Tony Hawk.

Customer Reviews

The layout of the pictures does not work well with eBook readers. Following the steps in order requires flipping pages back and forth all the time which is rather confusing. The "history of skateboarding" section is merely a summary of various Wikipedia pages. The trick photos are not very appealing. Many of the tricks are just frontside/backside variations, so cut the number of unique tricks in half. There are many formatting errors like missing spaces after dots. Most tricks are not clearly separated by headlines, but only by the annotation of the picture sequence. Having said that, the book does explain the tricks as advertised and does give hints on what's particularly difficult about each trick. Overall a rather disappointing eBook experience.

Evan Goodfellow has an uncanny gift for explaining skateboard maneuvers; better than most Professional Trick Tips from various skate mags I've read. While its great to have instant access to

such a plethora of tricks in a portable guide, this needs to be properly formatted for the Kindle...
