Customer Reviews

Richard Fisher hits a math home run with this latest offering, "No-Nonsense Algebra". With his usual friendly warm manner Mr. Fisher eases us into an otherwise uneasy math level. Potentially confusing and multi-step math concepts are simply and concisely taught in 5 to 10 minute lectures via on-line video, now free with the purchase of the 275 page, "No-Nonsense Algebra" text. Included in the text are 10 chapters each containing an average of 7 short-and-to-the-point two page spread lessons, in black and white, well spaced so as not to overwhelm. The first chapter gives a much

needed review of Pre-Algebra concepts so as to prepare our brains for Algebra. In each lesson is a short concise introduction to the concept being taught, two to six very well explained and illustrated examples, twelve to eighteen exercise problems and four helpful review problems to cover previously taught concepts. At the end of each chapter is a short Chapter Review consisting of twelve to eighteen problems. At the back of the book you will find: a Final Review covering all concepts learned, a glossary complete with illustrations, important algebraic formulas and symbols, a multiplication table, fraction/decimal equivalents, and more, then finally, the favorite of all of us homeschool teachers...the answer key! There are no worked problems in the answer key however since the book is so streamlined it is easy enough to go back to the chapter or video lesson and find the concept to quickly and easily figure out where the error or misunderstanding occurred. I used the Pre-Algebra book and DVD with my son, and I mean it when I say, he and I both learned the concepts so concretely that we didn't need worked problems in the answer key, so well taught are these lessons.
