Do Unto Animals: A Friendly Guide To How Animals Live, And How We Can Make Their Lives Better

Synopsis

#1 New York Times bestseller and USA Today bestseller The more we know about the animals in our world and the better we care for them, the better our lives will be. Former veterinary technician and animal advocate Tracey Stewart understands this better than most—and she's on a mission to change how we interact with animals. Through hundreds of charming illustrations, a few homemade projects, and her humorous, knowledgeable voice, Stewart provides insight into the secret lives of animals and the kindest ways to live with and alongside them. At home, she shows readers how to speak dog-ese and cat-ese and how to virtually adopt an animal. In the backyard, we learn about building bee houses, dealing nicely with pesky moles, and creative ways to bird-watch. And on the farm, Stewart teaches us what we can do to help all farm animals lead a better life (and reveals pigs' superpowers!). Part practical guide, part memoir of her life with animals, and part testament to the power of giving back, *Do Unto Animals* is a gift for animal lovers of all stripes.

Stewart, an animal advocate and the wife of television personality Jon Stewart, shares her love of animals and provides insight in how we can better communicate with and care for them. Stewart covers three types of animals humans typically interact with: domesticated pets (dogs and cats), backyard creatures (frogs, foxes, owls, snakes, etc.), and farm friends (cows, goats, sheep, etc.). In each section, Stewart provides information on how to care for these animals by providing a safe environment, healthy food, and tips to understand what your animal is saying. Through personal

stories, colorful illustrations, and homemade craft projects, Stewart achieves her mission to encourage people to give back to the creatures that give us so much. Throughout the book, Stewart emphasizes the importance of applying care to animals whether it be adopting an animal from a shelter or contacting a wildlife rehabilitator should you come across an injured animal. Stewart stresses the importance of not disrupting an animal's environment or personal balance and to leave delicate matters to the experts. However, many of us may not come across an injured fox or skunk but there are more common ways to apply proper care. Should you be looking to add a furry friend to your family, always visit your local animal adoption shelter. Buying pets from pet stores contributes to animal mills that systemically abuse and kill animals for breeding and profit. Stewart also provides commentary on not judging animals that have an unfairly bad rap such as pit bulls and black cats; two domesticated animals with higher euthanization rates due to public misconception about their breeds. While this book serves as a handy field guide for animal care, there is a lot more it offers.
