As a reprint, it is quite weird to have to qualify thing as to what should and shouldn't be proper. the problem is that the Upgrades not only have to deal with the switch to Total Warfare, but also skirting around the unseen. 3039 did so with amazing gusto (it replaced 3025 & 3026 as the intro TRO), 3050 & 3055 had other issues. 3050 had the clans invasion start and so showed off most of the

omnis, and since the revised showed off 2750 star league. so what do you do to replace not just some revisions to IS unseen, but also most of the clan refits? Simple, bring in Solaris 7 customs. It works, but only slightly. if at some time in the future, there is a wave of mk2 Upgrades, it would be nice to see this book, along with 3039 & 3050, with all the original units intact. I guess that will be when pigs gain bird wings though on leagal grounds.

I was pleased to see the new information in the TO 3055 Upgrade. The art work is very good and the new story backgrounds of the mechs helps flesh out the BT universe even further.
