## Synopsis

Get Better Results with high quality content, exercise sets, and step-by-step pedagogy! The Miller/O'Neill/Hyde author team continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Beginning and Intermediate Algebra 4e. The text reflects the compassion and insight of its experienced author team with features developed to address the specific needs of developmental level students. Throughout the text, the authors communicate to students the very points their instructors are likely to make during lecture, and this helps to reinforce the concepts and provide instruction that leads students to mastery and success. Also included are Problem Recognition Exercises, designed to help students recognize which solution strategies are most appropriate for a given exercise. These types of exercises, along with the number of practice problems and group activities available, permit instructors to choose from a wealth of problems, allowing ample opportunity for students to practice what they learn in lecture to hone their skills. In this way, the book perfectly complements any learning platform, whether traditional lecture or distance-learning; its instruction is so reflective of what comes from lecture, that students will feel as comfortable outside of class as they do inside class with their instructor.

## Customer Reviews

THIS IS NOT COMPATIBLE WITH THE OHIO STATE UNIVERSITY MATH CLASS 1075. Book came in great shape, but it's not the correct one. OSU has a special customized version of this book.

My book came to me in very good condition for a great price! I am very pleased with my order. It was delivered as promised. Thanks!

Its a math book, but at least it was the right one. I like that you can highlight things and do notes and flash cards.

It's the perfect book love the examples.

Book was fine, however I would like have known upon renting the book that if I decided to buy I would be paying double the price of the book. This was not clearly stated at rental. At rental time the purchase price was about double, but upon time to turn the book back in the purchase price had tripled. I will not rent books again.
